Re: **Tritech Engineering**

Project: **Maryfield Nursing Home, Chapelizod, Dublin 20**

TO WHOM IT MAY CONCERN :

I wish to confirm that Tritech Engineering have been engaged as our building services maintenance provider since December 2007. They provide essential building services maintenance in our 54 bed nursing facility. Tritech have performed the role of main contractor on a number of task projects and they demonstrated their competence to effectively manage & co-ordinate trades from programming, cost management, health & safety, etc.

We were very satisfied with their helpful, innovative & professional approach. They provide practical & economically advantageous solutions to issues. As this facility is operational 24 hour we needed a contractor who can provide proactive and experienced site Supervision & Tritech Engineering fulfilled these requirements.

I have no hesitation in recommending Tritech Engineering for future works & I look forward to continue working with Tom Comerford and his team in 2009.

Yours Faithfully,

PP *Kwely Farrell*
